

Kamal Joshi

Full Stack Technical Lead | Go | Java | TypeScript | AWS | AI-Native Development

Austin, TX | Open to remote-friendly and hybrid roles | Open to relocation for the right opportunity
+1-614-825-3047 | kamal2311@gmail.com | linkedin.com/in/kamaljoshiworks | github.com/kamal2311

PROFESSIONAL SUMMARY

Full-stack technical leader with 18+ years of experience building cloud-native platforms, API-driven integrations, and enterprise-scale backend services across Go, Java, TypeScript, and AWS. Proven track record of leading end-to-end delivery across multiple back-end technologies and collaborating with frontend and infrastructure teams to ship production-quality features at scale. Experienced in driving advanced product integrations and mentoring early-in-career engineers to grow team capabilities. Fluent in AI-native development workflows — daily use of Claude Code, GitHub Copilot, and Codex across the full SDLC.

CORE STRENGTHS

- **Full-stack development:** Go, Java, Spring Boot, TypeScript, JavaScript, Node.js, React, Angular, gRPC-Web, REST, JSON/HTTP APIs, microservices, event-driven systems
- **Learning agility:** Java → Go transition, gRPC-Web adoption, CloudEvents standard, AI-native workflows (Claude Code, Copilot, Codex), rapid cross-stack ramp-up — “perpetual learner” in practice
- **Cloud and infrastructure:** AWS (Lambda, ECS, EKS, S3, SQS/SNS, DynamoDB, Secrets Manager), Terraform, Kubernetes, Docker, CI/CD (Jenkins)
- **Observability and monitoring:** Splunk, distributed tracing, DLQ recovery, deployment validation
- **Product integrations:** API gateways (Kong), OAuth 2.0, OIDC, CloudEvents, webhooks, third-party integrations, rate limiting
- **Engineering leadership:** technical design, mentoring and coaching early-in-career engineers, production ownership, incident recovery, cross-team collaboration, pragmatic architecture
- **AI-assisted SDLC:** daily use of Claude Code, GitHub Copilot, and Codex across implementation, IaC, testing, debugging, code review, and design exploration; working familiarity with agentic tool patterns (LLM + memory + tool use)

EXPERIENCE

Cisco

Software Engineering Technical Leader

November 2025 - May 2026 | Austin, TX

- Owned and led delivery across **API Gateway, Authorization Service, and Third-Party Integrations Service** — spanning full-stack design, implementation, production support, and cross-team coordination.
- Drove **advanced product integrations** with Chrome Enterprise Browser, Microsoft Intune, and Jamf Pro, enabling enterprise customers to connect Cisco Secure Access with tools already in their environments.
- **Diagnosed and fixed a Jamf / Intune integration issue live during a prospective customer evaluation**, helping restore confidence in the product experience and **contributing to the customer's purchase decision**.
- Prevented security-event message loss during a production incident by identifying a **300k+ message DLQ backlog**, quantifying impact across **15 orgs**, and redriving messages within **5-10 minutes** — demonstrating end-to-end observability and incident ownership.
- Led design and delivery of push security events capability using the open **CloudEvents** standard, delivering **alpha on schedule (Nov 2025)** with a team of three engineers.
- Drove cross-service design for **Splunk** and CloudEvents webhook formats, collaborating across alerts, security events, integrations, and notifications service teams.
- Resolved a customer-scale onboarding failure by tracing **250+ appliance registration requests** through API key auth and rate-limit behavior, driving durable fixes around retry/backoff, token reuse, and service ownership.

Senior Software Engineer

January 2021 - November 2025 | Austin, TX

- Ramped up within **one month** across three distinct engineering surfaces — **Angular frontend, Go backend services, and Terraform IaC** — on a new team, contributing production changes across all three areas.
- Advanced platform capabilities across API gateway, authorization, integrations, and event-delivery domains using **Go, AWS, Terraform**, and event-driven architecture.
- **Mentored early-in-career engineers** through code review, design feedback, and hands-on guidance, growing the team's Go and cloud-native platform skills.
- Integrated **AI tooling (Claude Code, Copilot, Codex)** into daily engineering workflow across the full SDLC — implementation, IaC, test generation, debugging, and code review; pioneered team-wide **GitHub Copilot** adoption ahead of broader Cisco AI initiatives.
- Built auth-tools, an internal authorization library adopted across multiple platform services, simplifying OAuth/policy enforcement integration for the team.

Randstad Technologies US at Cisco

Senior Software Developer

March 2015 - January 2021 | Dublin, OH

- Built and owned the **Angular/TypeScript** frontend for an Active Threat Analytics dashboard, including a type-assisted query authoring experience that reduced analyst friction.
- Implemented **gRPC-Web** client integration between the Angular UI and Go backend services, bridging the team's transition from Java/REST toward gRPC-based platform services.
- Designed and implemented **Go-based gRPC and JSON/HTTP APIs** for a cloud-native data ingestion platform — independently mastering Go after a career built in Java/Spring, delivering production services within the same team cycle.
- Built **OIDC/OAuth 2.0** authentication and authorization flows integrated across both frontend and backend layers.
- Reduced **100+ OWASP-reported security warnings to zero** through secure coding, browser security headers, input sanitization, and server-side validation.

Earlier Engineering Experience

Cognizant, Oracle, Collabera | January 2007 - February 2015

- Delivered backend services, workflow applications, and integrations across financial services, healthcare, insurance, and enterprise content domains.
- Built foundation in Java, REST APIs, service integrations, and maintainable engineering practices.

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate
- AWS Certified Developer - Associate
- MongoDB Certified Java Developer M101J
- Google Cloud Platform Essentials

EDUCATION

Bachelor of Engineering, Information Technology
Dharmsinh Desai University
