PROFESSIONAL SUMMARY

Senior backend software engineer with deep experience building RESTful APIs, authentication and authorization systems, and multi-tenant SaaS platforms. Built production REST services using Huma — a Go framework explicitly inspired by FastAPI — with declarative schema validation and automatic OpenAPI spec generation, the same design philosophy that underpins FastAPI. Strong foundation in async event-driven systems, secure backend design, and AI-assisted engineering workflows. Genuinely excited about agentic AI development: I have been a daily power user of Claude Code and GitHub Copilot for two years, building familiarity with agentic tool patterns (LLM + memory + tool use) from the inside. Fluent at directing AI to produce safe, testable, readable code while owning design, quality, and outcomes.

CORE STRENGTHS

- **REST API development:** Go (Huma framework, inspired by FastAPI), Java/Spring Boot, gRPC, JSON/HTTP APIs, OpenAPI spec, declarative schema validation
- **Authentication and authorization:** OAuth 2.0, OIDC, OPA policy enforcement, API key management, multi-tenant authorization services, JWT/JWKS
- **Async and event-driven systems:** SQS/SNS async pipelines, DLQ recovery, CloudEvents, real-time event delivery, Python Lambda functions (AWS)
- **Backend reliability:** production ownership, incident response, CI/CD (Jenkins), Git, automated testing, deployment validation
- **AI and agentic systems:** daily use of Claude Code, GitHub Copilot, Codex; working familiarity with agentic tool patterns (LLM + memory + tool use); pioneered team-wide Copilot adoption
- **Data:** DynamoDB, Oracle/SQL (Cognizant, Oracle Corp), relational and nonrelational databases

EXPERIENCE

Cisco

Software Engineering Technical Leader

November 2025 - May 2026 | Austin, TX

- Built production REST APIs for the Integrations Service using **Huma**, a Go framework explicitly inspired by FastAPI — sharing its declarative schema validation, automatic OpenAPI generation, and structured request/response handling.
- Owned **Authentication** and **Authorization Service** for Cisco Secure Access, designing **OAuth 2.0/OIDC** token flows, **API key management**, and **multi-tenant** policy enforcement.
- Led design and delivery of a **real-time async event delivery** capability using CloudEvents, delivering **alpha on schedule (Nov 2025)** with a team of three engineers.
- **Prevented security-event message loss** during a production incident by identifying a **300k+ message DLQ backlog**, quantifying impact across **15 orgs**, and redriving messages within **5-10 minutes**.
- **Diagnosed and fixed a critical integration issue live during a prospective customer evaluation**, contributing directly to the **customer's purchase decision**.

Senior Software Engineer

January 2021 - November 2025 | Austin, TX

- Built auth-tools, an internal **authorization library** adopted across multiple platform services to simplify OAuth/policy enforcement integration.
- Integrated **AI tooling (GitHub Copilot, Claude Code, Codex)** into daily engineering workflow across the full SDLC; pioneered team-wide Copilot adoption ahead of broader Cisco AI initiatives.

- Wrote **Python Lambda functions** for AWS infrastructure automation, including signing key rotation workflows.
- Mentored early-in-career engineers through code review and design feedback.

Randstad Technologies US at Cisco

Senior Software Developer

March 2015 - January 2021 | Dublin, OH

- Designed and implemented **Go-based gRPC and JSON/HTTP REST APIs** for cloud-native data ingestion platforms.
- Built **OIDC/OAuth 2.0** authentication and authorization flows across frontend and backend services.
- Reduced **100+ OWASP-reported security warnings to zero** through secure coding, browser security headers, and server-side validation.

Earlier Engineering Experience

Oracle, Cognizant, Collabera, and others | January 2007 - February 2015

- Built Java REST APIs for a healthcare product at Cognizant (2007-2010) with Oracle as the backend database.
- Worked as a Java developer at Oracle (2010-2013) on enterprise data systems.
- Delivered backend services across financial services, healthcare, insurance, and enterprise domains.

| CERTIFICATIONS

- AWS Certified Solutions Architect - Associate
- AWS Certified Developer - Associate
- MongoDB Certified Java Developer M101J
- Google Cloud Platform Essentials

| EDUCATION

Bachelor of Engineering, Information Technology
Dharmsinh Desai University
